PROJECTS

Create Admin Dashboard for Booking Application (Bootstrap, JS, PHP, MySQL)

Smart India Hackathon - 2022 (Finalist) • June 2022 - August 2022
•My work to create an admin dashboard for the Aadhaar card Appointment booking app.
•Created an admin dashboard using HTML, CSS, JS, Bootstrap, PHP, and MySQL for the Aadhaar card Appointment Booking App.

E-Commerce WebApp (React.js, ContextAPI) [Link]
•Created an E-Commerce web app using React.js and Tailwind CSS. It is fully responsive.
•For state management used Context API and reduced Browser memory load by 80%.

Speech to Text Generator (React.js) [Link]
•This Convert Human Speech to a Text Form.
•This Provides some functionality like Copy Text, Start Listening, Stop Listening, and reset button.

Blog WebApp (MERN Stack) [Link]
•This is a full-stack Project. In this, you can Read and Add a New Blog.

Foodie (Food Order WebApp) (React.js, redux/toolkit) [Link]
•This is a Food Order WebApp. In this, you can filter items, select items by category, and order selected items. •For cart state management used Redux/toolkit. By using Redux/toolkit the complexity of state management is reduced by 70%.
