PROFESSIONAL SUMMARY

Full Stack .NET Developer with around 2 years of professional experience building web applications and backend systems using C#, ASP.NET (MVC/Core), ASP.NET Core Web API, SQL Server and React.js. Skilled in developing RESTful APIs with Repository/Service architecture, stored procedures, SignalR real-time features and JWT authentication, along with responsive interfaces using HTML5, CSS3, JavaScript, Bootstrap, Tailwind CSS and jQuery. Also experienced in C# console applications, Windows Services and WinForms desktop systems with SQL Server, Crystal Reports and QuickBooks integration.

TECHNICAL SKILLS

- **Backend Development:** C#, ASP.NET, ASP.NET MVC, ASP.NET Core, ASP.NET Core Web API, RESTful APIs, JWT Authentication, Repository Pattern, Service Layer Architecture, DTO Architecture
 - **Frontend Development:** HTML5, CSS3, JavaScript, React.js, jQuery, Bootstrap, Tailwind CSS, Razor Views, Mobile-first Design, Media Queries, Flexbox, Grid
 - **Database:** Microsoft SQL Server (MSSQL), SQL, SQL Server Management Studio (SSMS), Database Design, Stored Procedures, Query Optimization, ADO.NET
 - **API & Communication:** Swagger, Postman, SignalR, WebSocket, API Integration, Payload Testing
 - **Tools:** Visual Studio 2022, Visual Studio Code, Cursor, Google Antigravity (AI-assisted development), Git, GitHub, Vercel, Netlify, GitHub Pages
 - **Other:** Console Applications, Windows Services, WinForms, VB.NET, Crystal Reports, Amazon Textract, Zoho CRM, QuickBooks
-

PROFESSIONAL EXPERIENCE

Junior Software Developer | Destiny Solutions Pvt. Ltd.

July 2025 – Present

Full-time | Ahmedabad, Gujarat | On-site

- Develop and maintain **ASP.NET Core Web API**, **C#** and **SQL Server** solutions, including REST APIs, stored procedures and Repository/Service-based backend architecture.
- Build business applications and automation tools across web, Windows Service, console and WinForms platforms, with real-time features using **SignalR**.

Full-Stack Intern | Patel Web Solution

Oct 2024 – June 2025

- Worked on web application development using **ASP.NET MVC**, **ASP.NET Core**, and **MSSQL (SQL Server)** with stored procedures. Assisted in developing React.js components and integrating them with backend APIs.
 - Developed modular components and interfaces using **React.js**, **jQuery**, and **Bootstrap**, with additional styling via **Tailwind CSS**. Participated in cross-browser testing, debugging, code reviews, and meetings to improve quality and maintain coding standards.
 - Used **Razor Views**, **HTML5**, **CSS3**, and **JavaScript** to build responsive layouts with **Flexbox**, **Grid**, and **Media Queries** based on a **mobile-first approach**.
 - Gained hands-on experience with **RESTful services** and integrated APIs across various modules.
 - Used tools like **Visual Studio**, **VS Code**, **SSMS**, and version control via **Git**. Participated in deployments using **Vercel**, **Netlify**, and **GitHub Pages**.
-

PROJECTS

1) Zoag: Enterprise Business Application

ASP.NET Core Web API, C#, SQL Server, SignalR, Swagger, Postman

- Built and maintained REST APIs for modules like Quotes, Sales Orders, Inventory, Customers and Reports, using a Repository/Service architecture with token-based security.
- Wrote stored procedures and implemented SignalR for real-time online-user tracking.
- Developed DTOs and standardized API response structures for consistent integration across modules.
- Implemented user assignment/unassignment features and handled API enhancements, database changes and business-logic updates, with testing in Swagger and Postman.

2) Display: Digital Signage Platform

ASP.NET Core Web API, C#, SQL Server, JWT, SignalR, Cloudflare R2

- Developed REST APIs for scheduling, dashboard widgets, emergency broadcast, weather-based scheduling and white-label branding.
- Implemented multi-tenant database routing, Cloudflare R2 asset storage, 2FA/OTP verification and role-based user management.
- Designed optimized stored procedures with joins, filtering, pagination and data aggregation for schedule and dashboard modules.
- Built offline fallback and default media features for uninterrupted screen content, plus SignalR-based real-time screen and user status.

3) Synthesis: PDF Invoice & Payroll Automation

C# Console App, Amazon Textract, iTextSharp, Aspose.Pdf, SQL Server, ADO.NET

- Automated data extraction from multi-page vendor invoices and payroll PDFs using Amazon Textract, with vendor-specific parsing logic.
- Added PDF validation, error logging and duplicate handling before storing data in SQL Server.
- Built a vendor-routing mechanism that sends each invoice format to its own extraction method, mapping fields like Invoice ID, UPC, Quantity and Amount.
- Developed a separate payroll processing app to extract Check Date, Net Pay and Employer Liabilities and insert cleaned data into the database.

4) TxPartsSync: POS & TxParts Synchronization Service

C#, .NET Windows Service, REST APIs, SQL Server, Crystal Reports, ZXing

- Built a Windows Service that syncs customers, items, orders and credit memos between the POS and TxParts API, with retry handling and sync history tracking.
- Generated invoice barcodes (ZXing) and printable reports (Crystal Reports).
- Ran synchronization at configurable intervals with locking to prevent overlapping sync processes.
- Integrated token-authenticated REST APIs with JSON mapping and maintained POS-to-TxParts ID mappings through a DAL layer using stored procedures.

5) SalesPOS: Sales & Inventory Management System

C#, .NET WinForms, SQL Server, Crystal Reports, ZXing, QuickBooks

- Developed modules for customers, orders, invoices, shipping, returns and credit memos, including barcode-based invoice verification.
- Implemented profit reports and QuickBooks integration for accounting data sync.
- Built invoice creation, editing, printing and history features, along with a customer center for pending invoices, returns and credit memos.
- Enhanced existing modules, fixed application issues and improved data handling across the POS system using SQL Server stored procedures.

6) Rosier Chocolate Shop [\[Link\]](#)

ASP.NET MVC 5 (C#), SQL Server

- E-commerce web application built with ASP.NET MVC where users browse and order premium chocolates, cancel orders and print invoices, with an admin dashboard to manage products, customers and orders. Built using Razor Views, Bootstrap and jQuery.

7) MCBS (Mini Core Banking System) [\[Link\]](#)

ASP.NET Core 6.0 MVC, Razor Views, Bootstrap 5, SQL Server, Session-based Auth

- Secure core banking application built with ASP.NET Core MVC, featuring account creation, customer login, fund transfers, transaction history and an admin panel. Uses SQL Server stored procedures and session-based authentication, with Razor Views and Bootstrap 5.

EDUCATION & CERTIFICATION

Bachelor of Computer Application (BCA)

- Silver Oak University [Dec 2023 – Dec 2026]

Certification

- Full-Stack Development Certificate - [Patel Web Solution – 2025]
